

## SolarTech Power Solutions

# 10gw solar cells and modules

## Overview

---

Will a 10GW solar cell & module capacity increase in 18 months?

However, this will not affect the company's goal to reach 10GW of solar cells and module annual nameplate capacity in the coming 18 months, a 2.5x increase from the current cell and module capacity operational, which sits at 4GW for both solar cells and modules.

How many GW of solar cells does Adani solar have?

Presently, Adani Solar has 4 GW of solar cell and module capacity, comprising 2 GW for mono PERC and TOPCon each. The production is running at full capacity and serves 50:50 demand from domestic and export markets. At REI Expo 2024, Adani Solar unveiled its Shine series n-type TOPCon dual-glass modules based on rectangular wafers.

Will Adani solar build a 10GW polysilicon plant?

Image: Jonathan Touriño Jacobo for PV Tech. Indian solar manufacturer Adani Solar is reassessing the timeline of its plan to build a 10GW polysilicon manufacturing plant due to the tumbling prices of polysilicon in the past 18 months.

How many GW is a cell & module capacity in India?

The Indian manufacturer currently has a cell and module capacity of 4 GW. From pv magazine India.

Will Adani solar reach 10GW capacity in 18 months?

During RE+ 2024, Adani Solar told PV Tech that it expects to reach 10GW of capacity for solar cells and modules in 18 months. Image: Jonathan Touriño Jacobo for PV Tech.

Will Adani solar achieve 10 GW of metallurgical grade silica-polysilicon-ingot-wa?

Bhutiani said Adani Solar will achieve 10 GW of metallurgical grade (MG) silica-polysilicon-ingot-wafer capacity by December 2027. It will also expand its ancillary unit production for solar glass, aluminum frames, encapsulants and backsheets to 10 GW by December 2027. The company has an ingot-wafer capacity of 2 GW already operational.
