

## SolarTech Power Solutions

# 16MWh energy storage power station project

## Overview

---

Will Tesla build a grid-scale battery energy storage station in China?

Tesla has officially signed a ¥4 billion (C\$764/US\$557 million) deal to build its first grid-scale battery energy storage station in China, leveraging its Megapack technology.

What is photovoltaic power station energy storage project in Shandong?

It is one of the first batch of photovoltaic power station energy storage projects in Shandong, equipped with many functions such as peak load shifting, AGV/C dispatching, primary/secondary frequency regulation, etc. It can meet various requirements such as charging by abandoned light, demand side response, and grid side safety.

Why is Tesla building a large-scale energy storage facility in China?

Their growing use helps stabilize power grids, prevent outages, and reduce reliance on fossil fuels. This project is Tesla's first large-scale energy storage installation in China, complementing its existing automotive manufacturing presence in the city through Giga Shanghai.

Will Tesla build China's largest grid battery project using megapacks?

Tesla to build China's largest grid battery project using Megapacks in a \$556M deal amid ongoing trade tensions.

How much power does a Megapack provide?

One Megapack can provide up to 1 megawatt of power for four hours. "The grid-side energy storage power station is a 'smart regulator' for urban electricity, which can flexibly adjust grid resources," Tesla said on Weibo, according to a Google translation.

Could a grid-side energy storage power station solve urban electricity problems?

"The grid-side energy storage power station is a 'smart regulator' for urban electricity, which can flexibly adjust grid resources," Tesla said on Weibo, according to a Google translation. This would "effectively solve the pressure of urban power supply and ensure the safe, stable and efficient electricity demand of the city," it added.
