

SolarTech Power Solutions

Albania Hybrid Energy Storage Power Generation

LiFePO₄ Battery, safety

Wide temperature: -20~55°C

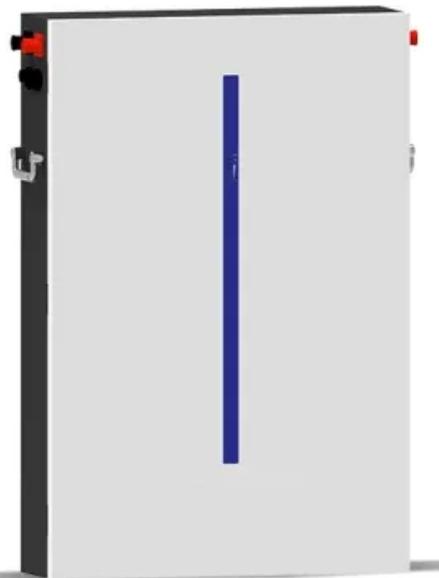

Modular design, easy to expand

Wall-Mounted&Floor-Mounted

Intelligent BMS

Cycle Life: ≥ 6000

Warranty: 10 years

Overview

Could a gigawatt power plant be in Albania?

Masdar and state-owned power utility KESH signed a joint venture term sheet agreement to explore the development of gigawatt-scale projects in Albania. The renewable electricity plants, potentially with storage, would supply power to the country and its neighbors.

Does Albania have a hydro power plant?

Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable. The total installed generation capacity has increased over the last few years because of new private investments in hydro power plants and more recently in small solar farms.

Should Albania's energy mix include more renewables?

While Albania's energy mix already features one of the highest shares of renewables in the region owing to its extensive installed hydropower capacity, the essential need remains for a more secure, cost-competitive national energy supply. Diversifying the electricity mix to include more renewables would strengthen Albania's energy security.

What is Albania's energy mix?

Hydropower accounts for the largest share of the country's electricity generation, representing around 95% of the Albania's installed power capacity. This means Albania's energy mix has one of the highest shares of renewable energy in South East Europe; however, it is also highly dependent on annual rainfall.

What is Albania's energy sector strategy?

In 2018, Albania adopted its National Energy Sector Strategy, which examined various energy development scenarios and set forth a series of key indicators

and objectives that will shape Albanian's energy sector over the period from 2018 to 2030 (Table 2). Most notably, the strategy stipulated a 42% share of renewable energy in the TPES by 2030.

Does Albania have a strong focus on hydro vs non-hydro renewables?

The Albanian Renewable Energy Association, due to the country's history of hydropower production, has a stronger focus on hydro than non-hydro renewables.
