

## Overview

---

As we approach Q4 2025, three trends are shaping Tirana's storage landscape: Just last month, a major developer announced plans for Europe's first urban "storage skyscraper" – a 22-story building where every other floor houses battery containers. Could this be Tirana's.

As we approach Q4 2025, three trends are shaping Tirana's storage landscape: Just last month, a major developer announced plans for Europe's first urban "storage skyscraper" – a 22-story building where every other floor houses battery containers. Could this be Tirana's.

Renewables developer EU Green Energy LLC has selected Energy Vault Holdings Inc's (NYSE:NRGV) technology for the deployment of up to 1.8 GWh of new battery energy storage system (BESS) capacity across the Balkans, starting with a project in Albania. Energy Vault Holdings, Inc. (NYSE: NRGV) (“Energy Vault” or the “Company”), a global leader in grid-scale energy storage solutions, today announced the signing of a Framework Supply Agreement (FSA) with EU Green Energy LLC (“EU Green Energy”), a leading renewable energy developer in the Balkan.

Phase 1 development of the first project under the agreement, featuring a 50 MW / 200 MWh BESS located in the Balkans, has been contracted under Energy Vault's B-VAULT™ and Vault-OS™ platform WESTLAKE VILLAGE, Calif., November 04, 2025 -- (BUSINESS WIRE)--Energy Vault Holdings, Inc. (NYSE: NRGV).

Energy Vault Holdings, Inc. (NYSE: NRGV) (“Energy Vault” or the “Company”), a global leader in grid-scale energy storage solutions, today announced the signing of a Framework Supply Agreement (FSA) with EU Green Energy LLC (“EU Green Energy”), a leading renewable energy developer in the Balkan.

Energy Vault and EU Green Energy partner to expand battery energy storage projects and boost renewable capacity across the Balkans. United States-based Energy Vault Holdings Inc. said Tuesday it signed a framework

agreement with EU Green Energy LLC to deploy up to \$250 million worth of battery.

Albania's electricity grid currently loses 18% of generated power during transmission - equivalent to powering 300,000 homes annually. With the Tirana ERA project targeting 2025GW capacity, the clock's ticking to solve this energy paradox. Solar generation peaks at noon while demand surges at 7 PM.
