Angola Energy Storage Station Fire Control System

Overview

What are the characteristics of electrochemical energy storage power station?

2.2 Fire Characteristics of Electrochemical Energy Storage Power Station

Electrochemical energy storage power station mainly consists of energy storage unit, power conversion system, battery management system and power grid equipment.

Can energy storage power stations monitor fire information?

Fire information monitoring At present, most of the energy storage power stations can only collect and display the status information of fire fighting facilities (such as fire detectors, fire extinguishing equipment, etc.) in the station.

How is information transmitted between fire control room and energy storage station?

The information between the fire control room and each energy storage station can be transmitted by optical cable or wireless communication, and based on the communication protocol DL/T634.5101 and DL/T634.5104, the relevant secondary equipment is deployed in the security II area.
