Overview

The Georgia PSC has approved five new PPAs under Georgia Power's CARES 2023 program, totaling 1,068 MW of solar capacity, with one project also including battery storage.

The Georgia PSC has approved five new PPAs under Georgia Power's CARES 2023 program, totaling 1,068 MW of solar capacity, with one project also including battery storage.

Georgia Power has embarked on an ambitious initiative to enhance the state's energy infrastructure by commencing the construction of 765 megawatts (MW) of new battery energy storage systems (BESS) across four counties in Georgia. This strategic move aims to bolster grid reliability and support the.

Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill was passed after much collaboration and effort. Community solar is the next big piece of the puzzle that.

Georgia Power has started construction on a new standalone battery storage system, a 200 MW project in Twiggs County, Georgia. This project marks a significant milestone in Georgia Power's efforts to enhance grid reliability, integrate renewable energy, and support the state's growing energy needs.

Georgia Power has requested certification from the Georgia Public Service Commission (PSC) for 9,900MW of new generation resources, including more than 3GW of battery storage that the utility would own. Approximately 8,000MW of the requested resources were chosen from an "all-source" request for.

Georgia Power has received approval from the Georgia Public Service Commission (PSC) to certify five new utility-scale solar project power purchase agreements (PPAs) to benefit its customers as well as supply the company's Clean and Renewable Energy Subscription (CARES) 2023 program. Third-party.
