

## SolarTech Power Solutions

# Austria Wind Power Battery Cabinet

- ✓ 100KW/174KWh
- ✓ Parallel up-to 3sets
- ✓ IP Grade 54
- ✓ EMS AND BMS

## Overview

---

Although is surrounded by land and is really hilly , preconditions permit the utilization of . First calculations on the basis of wind measuring data assessed at the meteorological stations in the early 1980s rendered the surprising result of annually approx. 6,600 to 10,000 (GWh) of technically exploitable wind energy potential in Austria.

How much wind energy does Austria have?

First calculations on the basis of wind measuring data assessed at the meteorological stations in the early 1980s rendered the surprising result of annually approx. 6,600 to 10,000 gigawatt-hour (GWh) of technically exploitable wind energy potential in Austria.

What are the hidden costs of wind power in Austria?

The hidden costs of wind power in Austria are currently not quantified. Most of the property owners are farmers. They have an additional source of income by leasing their land to the wind park operator. The prices paid for property leases for wind turbines are many times more than would normally be earned by farming the property.

Why should you choose a battery cabinet?

Our battery cabinets are sophisticated and offer modular solutions that can withstand even temperatures and earthquakes when it matters. **VENTILATION:** Our cabinets are specially designed for the use of stationary batteries. One important factor here is ventilation, both for cooling and for the removal of hydrogen (H<sub>2</sub>).
