

## SolarTech Power Solutions

# Automatic charging outdoor power supply

## Overview

---

How do I charge a power station?

See more EFFICIENT CHARGING: Use the adapter included in the package to charge the power station from 0 to 80% in 2hrs, and use the this power supply to charge other devices at the same time while charging, which could be equivalent to a charging strip , improving the efficiency of uses.

What is ups-AC/DC outdoor?

Our systems produce clean, uninterrupted power for critical AC and/or DC loads. In the event of AC (utility) power loss, the UPS-AC/DC Outdoor supplies back-up power for 24-48 hours, or longer if requested. We include a high quality, powder-coated, outdoor rated white aluminum enclosure, designed to house the battery and system electronics.

How to recharge a power station?

Two Recharging Ways: There are two ways to recharge the power station from AC wall outlet adapter and a solar panel (NOT INCLUDED). The main unit is equipped with a battery level indicator LED, so you can know well the battery level and charging status.

What is a ses AC/DC outdoor UPS?

The SES AC/DC Outdoor UPS™ system enclosure is powder coated white for cooler summer operation, and includes Goretex battery breather vents. Our systems produce clean, uninterrupted power for critical AC and/or DC loads. In the event of AC (utility) power loss, the UPS-AC/DC Outdoor supplies back-up power for 24-48 hours, or longer if requested.

What is a compact battery charging system?

Each compact battery charging system assembly features automatic boost/float temperature compensated charging, a low voltage disconnect and programmable alarm contacts. AC systems feature an industrial quality pure-

sine DC to AC inverter for AC loads. These components are all housed in a rugged outdoor-rated NEMA enclosure.

How do I choose a power station for my outdoor adventures?

Choosing a power station for your outdoor adventures hinges significantly on its IP rating, which reveals how well it can withstand the elements. The IP rating, or Ingress Protection rating, consists of two digits: the first indicates solid particle protection, while the second rates liquid ingress protection.
