

## SolarTech Power Solutions

# BESS Telecom Energy Storage Industrial and Commercial Storage System

12V 10AH

## Overview

---

What are the benefits of a Bess system?

Big savings potential. Take control of your energy consumption, offsetting costs through peak shaving and other capabilities. Positive impact. Reduce CO2 emissions by integrating renewable energy sources—like solar or wind—into your power system. Count on a fully integrated storage system. Our BESS solutions are:.

What is a battery energy storage system (BESS)?

Compact, end-to-end modular battery energy storage system (BESS) and energy management designed for enhanced energy density while delivering significantly reduced installation costs.

What is EPA's Bess guidance?

EPA has developed comprehensive guidance to help communities safely plan for installation and operation of BESS facilities as well as recommendations for incident response. This webpage includes information from first responder and industry guidance as well as background information on battery energy storage systems and resources.

What safety measures should be included in a Bess site design?

Proactive safety measures can be included in a BESS site design to minimize the risk of a BESS fire. Consider the following before installing a BESS: Comply with state and local siting, zoning, marking, and permitting requirements to ensure site suitability.

What should be included in a Bess Incident Response Plan?

Consider the following when developing an incident response plan for BESS: Ensure use of Personal Protective Equipment (PPE) including self-contained breathing apparatuses to protect against hazardous air emissions. Set an isolation zone for large commercial BESS that is at least 330 feet, depending

on the site.

How should a Bess site be prepared for a fire?

Package contents safely for transport and disposal after the event, considering Department of Transportation and EPA requirements. In addition to adhering to existing standards, communities and operators of BESS sites should reference existing resources to enhance fire preparedness and response plans.
