

## SolarTech Power Solutions

# BESS price for Oman energy storage project

## Overview

---

Will Oman have a solar energy storage system?

Additionally, PDO is finalizing plans for a 100 MW solar PV-based IPP, named the 'North Solar Storage IPP,' set to include Oman's first battery energy storage system (BESS). This BESS, using lithium-ion battery technology, will store electrical energy and supply a maximum of 100 MW peak power to PDO's grid during daylight hours.

Will Oman launch a 100 MW solar PV plant in 2025?

In 2025, Petroleum Development Oman is expected to launch the 100 MW North Solar Storage PV plant, featuring the country's first lithium-ion battery system to ensure energy transmission beyond daylight hours with a 100 MW peak capacity.

What is the Bess project?

The BESS project is an addition to the 500 MW Abydos solar PV project under construction. Meanwhile, UAE's EWEC has recommended deploying 300 MW/300 MWh of BESS capacity within the next three years. While the demand for energy storage is growing, the technology has existed in other forms for years.

Is large-scale energy storage a viable option in the Middle East?

Until recently, large-scale energy storage was barely a consideration in the Middle East, where fossil fuels have long dominated power generation. With renewable energy projects expanding across the region, energy storage has started gaining traction.

How many gw/40 GWh will a Bess project deliver?

The Saudi Power Procurement Company aims to deploy 10 GW/40 GWh of standalone BESS capacity by 2030 through annual tenders of 2 GW/8 GWh starting in 2024. In the UAE, the Emirates Water and Electricity Company

(EWEC) issued a request for proposals for a 400 MW/400 MWh standalone BESS project in mid-2024.

Which countries are planning a Bess project in 2024?

In the UAE, the Emirates Water and Electricity Company (EWEC) issued a request for proposals for a 400 MW/400 MWh standalone BESS project in mid-2024. Oman is also boosting energy storage with plans to add BESS to the 500 MW Ibri III Solar IPP, which is now in the early procurement stage.
