

## SolarTech Power Solutions

# Bahamas outdoor plus solar power generation for home use

## Overview

---

The Caribbean island nation of the Bahamas is turning to independent power producers (IPPs), the combination of “solar plus storage” and hybrid microgrids to extend sustainable energy access, improve energy reliability and resiliency, and reduce carbon emissions and environmental footprints on four of the archipelagic nation’s 30 inhabited islands (pop. around 400,000). What is the Bahamas national energy policy?

The latest release of The Bahamas National Energy Policy documents the country’s plans to implement renewable energy generation. This will introduce net-metering, which is the recording of energy flows in both directions. As the Bahamas has close to six daily peak sun hours. Solar Power can offset a significant part of your power bill.

Is solar a good option in the Bahamas?

On a kilowatt-hour (kWh) by kilowatt-hour basis, solar’s your best, but you need to add battery energy storage capacity in order to reach higher levels of penetration,” he noted. “Nassau’s [the Bahamas’ largest city] is a pretty big grid, and it can take a fair bit of solar without storage,” Burgess continued.

Does Bahama have a solar power project?

The Bahamian government owns and manages property rooftops, parking lots and green spaces, on which solar power projects could be developed. Several projects that capitalize on that solar power potential are underway, Jones Bahamas points out.

Is the Bahamas a difficult place to generate electricity?

BPL Chairman Donovan Moxey was quoted in a Tribune Business news report. The Bahamas is a very difficult place to generate electricity, distribute it and sell it, even as compared to other Caribbean islands, Chris Burgess, Islands Energy Program projects director, told Solar Magazine.

How is the Bahamas reducing its energy monopoly?

The Bahamas has been taking steps to end the state-owned utility's energy monopoly and reduce the energy sector's carbon and environmental footprints in line with national and international greenhouse gas (GHG) emissions and climate change goals. Government leaders have earmarked \$170 million for renewable energy financing in the 2019-2020 budget.

How will the family Islands solar power system work?

Development of the four solar-fueled power systems will set the stage to scale the Family Islands solar program across the island chain's outlying islands, as well as contribute to the Bahamas achieving a national goal of renewable energy resources meeting 30% of electricity needs by 2030.
