Bangladesh Energy Storage Power Station Construction Plan

Overview

What's in the Bangladesh Power Sector Roadmap?

The roadmap highlights specific use-cases for consideration in the Bangladesh power sector over three different future time horizons. It also includes a summary of indicative policy and regulation actions and interventions that may be considered to enable the deployment of energy storage within the defined time horizons.

What is a master plan for energy supply in Bangladesh?

Demand in the northern Bangladesh substantially falls in winter season and instead, the surplus of energy can be exported to India. The Master Plan was developed by assessing the need of energy and power supply for the future. The plan is not the end of product, but any future potential development can be incorporated and adopted accordingly.

Can energy storage be used in Bangladesh?

Concluded in May 2023, the assignment assessed available energy storage technologies, evaluated the role of energy storage in the current grid conditions, identified potential storage locations, analysed energy storage requirements under variable renewable energy (VRE) integration, and developed a roadmap for energy storage in Bangladesh.

How a master plan is developed in Bangladesh?

The Master Plan was developed by assessing the need of energy and power supply for the future. The plan is not the end of product, but any future potential development can be incorporated and adopted accordingly. Cost of utilization of renewables in Bangladesh is higher than that of India and thermal energy cost is lower in India.

Does Bangladesh have a long-term energy plan?

To this end, Bangladesh has developed major long-term energy plans such as

Power System Master Plan 2016 (PSMP2016) / Revisiting Power System Master Plan 2016 (Revisiting PSMP2016), Energy Efficiency and Conservation Master Plan 2016 (EECMP2016), and Gas Sector Master Plan 2017 (GSMP2017).

What can be done about grid connected energy storage in Bangla-Desh?

Limited experience and knowledge of grid connected energy storage in Bangladesh. Early-stage pilot programmes such as the planned 2MW grid connected BESS funded by the Asian Development Bank (ADB) would further support capacity building and knowledge transfer. 3.3.
