

SolarTech Power Solutions

Bhutan energy storage equipment

Overview

What is Bhutan's energy supply?

Bhutan's energy supply primarily relies on electricity, fuel-wood, coal, and diesel. Electricity is the largest contributor, with a shift towards increased usage over the years. Fuel-wood usage has decreased, while bio-gas, solar energy, and limited-scale wind energy have gained traction as alternative sources.

How can Bhutan achieve sustainability goals?

By prioritizing renewable energy sources, improving energy efficiency, and reducing reliance on fossil fuels, Bhutan can mitigate environmental impacts, enhance energy security, and achieve its long-term sustainability goals.

What is the Bhutan energy data directory?

The Bhutan Energy Data Directory is a valuable resource for policymakers, researchers, and anyone interested in the energy sector of Bhutan. It provides a wealth of data and information on various aspects of Bhutan's Energy Sector, including energy production, consumption, and distribution.

How does the Department of Energy (DOE) work in Bhutan?

The DoE plays a pivotal role in shaping Bhutan's energy landscape and driving sustainable growth in the sector. The Department is structured into four constituent divisions: the Energy Strategy & Planning Division, Energy Resource Development Division, Power Systems & Market Division, and Energy Innovation & Management Division.

Why are Road and air transport services important in Bhutan?

In Bhutan, road and air transport services dominate due to the absence of alternative modes of transport. However, this heavy reliance on these modes of transport has significant implications for energy consumption and environmental sustainability, as almost all the energy used in the Sector is

derived from imported fossil fuels.

What is the building sector in Bhutan?

The Building Sector is divided into residential and commercial and institutional segments. Electricity has become the primary energy source in Bhutan, with the Building Sector shifting from fuel-wood to electricity. Industries consume the most electricity, followed by residential households.
