Bolivia rooftop solar system

Overview

The government has announced a project to install solar panels in rural areas—an ambitious initiative that will bring electricity to 20,000 families across 110 communities in 35 municipalities. This marks a major milestone in Bolivia’s push to expand electricity access and promote.

The government has announced a project to install solar panels in rural areas—an ambitious initiative that will bring electricity to 20,000 families across 110 communities in 35 municipalities. This marks a major milestone in Bolivia’s push to expand electricity access and promote.

Bolivia is advancing its rural electrification efforts with a substantial \$325 million investment in renewable energy. The government has announced a project to install solar panels in rural areas—an ambitious initiative that will bring electricity to 20,000 families across 110 communities in 35.

The 120 MW project will contribute to the decarbonization of the Bolivian energy matrix and will benefit more than 318,000 people, consolidating Bolivia's leadership in renewable energies in the region. The Board of Directors of CAF, Development Bank of Latin America and the Caribbean, approved.

To allow for 300,000 photovoltaic solar panels in the western Bolivian town of Ancotanga, local inhabitants gave up land in exchange for promises of jobs and healthcare — that they are still waiting to see.
