

SolarTech Power Solutions

Bulgarian Electricity Commercial Power Direct Supply Base Station

Overview

What is the main source of electricity in Bulgaria?

Nuclear is the largest source of power followed by coal and solar. Bulgaria consumes about 35 TWh of electricity per year, and some is exported. The residential sector is the largest consumer, followed by industry then services. Nuclear power generates about a third of electricity in Bulgaria.

What is the energy sector in Bulgaria?

The electricity sector in Bulgaria is an important part of energy in Bulgaria and is highly diversified. [citation needed] Nuclear is the largest source of power followed by coal and solar. Bulgaria consumes about 35 TWh of electricity per year, and some is exported.

How much electricity does Bulgaria use a year?

Bulgaria consumes about 35 TWh of electricity per year, and some is exported. The residential sector is the largest consumer, followed by industry then services. Nuclear power generates about a third of electricity in Bulgaria. Bulgaria's first commercial nuclear reactor began operation in 1974.

What will Bulgaria's energy system operator do in 2024?

By the end of 2024, Bulgaria's Electricity System Operator (ESO) will finalize its investment program aiming to ensure the grid connection of new power plants with a total installed capacity of 4,500 MW, primarily renewables. ESO, the country's transmission system operator, has invested more than EUR 25 million in digitalization of the grid.

Does Bulgaria use nuclear power?

Nuclear power generates about a third of electricity in Bulgaria. Bulgaria's first commercial nuclear reactor began operation in 1974. The Kozloduy NPP operates two pressurized water reactors with a total output of 1906 MW. This makes Bulgaria the 21st-largest user of nuclear power in the world.

Does Bulgaria have a hydro power plant?

In Bulgaria, the National Electric Company (NEK) owns 15 conventional hydro and pumped-storage plants. Hydropower's importance is not limited to the production of energy because it plays a key role in greenhouse gas emissions reduction. Bulgaria remains the most energy-intensive economy in the EU by a wide margin.
