

SolarTech Power Solutions

Capacity 500kwh lithium battery pack

Overview

What is a 500 kW battery?

Built for rapid deployment, our 500 kW capacity batteries are a fast way to increase your efficiency, on or off the grid. Packaged with everything you need – from fire protection to HVAC – they’re an effective way to store and reuse energy, increasing your flexibility while reducing fuel consumption.

How does a lithium battery energy storage system work?

When the power grid is out of power, the lithium battery energy storage system can act as an independent inverter power supply to provide AC power to important loads, thereby ensuring the needs of users. In areas with high electricity costs, it is also possible to build a large energy storage system solely to sell electricity.

How much energy does a 500 Wh/kg battery produce?

The record 500 Wh/kg energy density performance was verified by Mobile Power Solutions, a leading testing house offering comprehensive battery regulatory compliance, safety, and performance testing. The results indicate that this cell model provides >504 Wh/kg and >1321 Wh/l at 25°C.

Why do you need a 500 kilowatt generator?

Packaged with everything you need – from fire protection to HVAC – they’re an effective way to store and reuse energy, increasing your flexibility while reducing fuel consumption. Whether you’re dealing with variable loads, consumption that outpaces the grid, or noise issues with generators, these 500-kilowatt units can help.

Will Amprius' 500 Wh/kg cell improve Zephyr's stratospheric endurance capabilities?

“We look forward to taking advantage of Amprius' 500 Wh/kg cell to further develop Zephyr's unrivalled stratospheric endurance capabilities,” said Pierre-

Antoine Aubourg, Chief Technical Officer at AALTO HAPS, the Airbus subsidiary developing the 100% solar-electric High Altitude Platform Station for connectivity and earth observation applications.

Why should you buy a new lithium-ion battery?

At approximately half the weight and volume of state-of-the-art, commercially available lithium-ion cells, the all-new battery cell delivers potential industry-disrupting performance with barrier breaking discharge times.
