# Cape Verde Solar Electricity System

## Overview

---

Cape Verde aims to get 50% of its electricity from resources by 2030 and 100% by 2050. This coincides with aims to bring down energy import costs and help the environment by reducing . The country has integrated wind and solar in its energy system. It also has the potential to utilize emerging technologies as .

As part of its ongoing renewable energy expansion, Cape Verde has inaugurated its largest photovoltaic solar plant—a 5 MW array on Sal Island. The project, built by Aguas de Ponta Preta, is one of several aimed at reducing the country's dependence on fossil fuels and stabilizing.

As part of its ongoing renewable energy expansion, Cape Verde has inaugurated its largest photovoltaic solar plant—a 5 MW array on Sal Island. The project, built by Aguas de Ponta Preta, is one of several aimed at reducing the country's dependence on fossil fuels and stabilizing.

Largest solar power plant in Cape Verde on Sal Island was inaugurated by Cape Verde's Ministry of Energy and Commerce that will help the country to save energy. This is true given that Aguas de Ponta Preta developed a 5 MW solar plant in Santa Maria that is quite significant to the country's.

Cape Verde is a net importer of energy, with no significant fossil energy resources. As of 2016, 176,743 tonnes of fuel (about 3,550 barrels per day) were sold on the internal market. [1] Electricity production was 443 GWh in 2016, of which 81% from thermal power, 17% from wind power and 1.4% from.
