# **Central Asia Grid-connected solar Inverter**

## Overview

---

What is the Asia-Pacific solar inverter market?

The Asia-Pacific Solar Inverter Market is Segmented by Type (Central Inverters, String Inverters, Micro Inverters, Cellular Glass, and Other Types), Application (Residential, Commercial & Industrial, and Utility-scale), and Geography (China, India, Japan, and Rest of Asia-Pacific).

Who are the key players in the Asia-Pacific solar inverter market?

The Asia-Pacific solar inverter market is fragmented. Some of the key players in the market (in no particular order) include Fimer SpA, Schneider Electric SE, Siemens AG, Mitsubishi Electric Corporation, and Omron Corporation.

What is a central inverter?

A central inverter is a large grid feeder. It is often used in solar photovoltaic systems with rated outputs over 100 kWp. Typically, floor or ground-mounted inverters convert DC power collected from a solar array into AC power for grid connection. These devices range in capacity from around 50kW to 1MW and can be used indoors or outdoors.

What is a solar inverter?

The solar inverter is one of the most important parts of a solar system and is often overlooked by those looking to buy solar energy. This review highlights the best inverters from the world's leading manufacturers to ensure your solar system operates trouble-free for many years.

Why do solar PV projects need central inverters?

Solar PV projects highly demand central inverters due to their technical benefits. For example, in October 2022, a 1.5MW hybrid BESS system commissioned in Leh Ladakh, India, featured a PVS980 1MW central inverter and a PVS980-BC 2MW energy storage inverter, provided by FIMER, one of the leading solar PV inverter companies in India.

What are 'string' solar inverters?

This review focuses on common 'string' solar inverters, the most popular type. These inverters use one or more strings (groups) of solar panels connected in series. String solar inverters are the most common type used in the UK, Europe, Australia, and Asia. They are also growing in popularity in the US, where microinverters are extremely popular.
