

## SolarTech Power Solutions

# Croatia BMS battery swap cabinet

## Overview

---

What is a battery management system (BMS)?

In a world where advanced battery technologies are essential to power electric vehicles, energy storage systems and industrial applications, Battery Management Systems (BMS) play a fundamental role. In particular, a BMS for high voltage batteries [ . ].

Who is BMS powersafe®?

Specialising in the intelligence of embedded systems, BMS PowerSafe® designs and manufactures intelligent battery management systems, integrating new-generation software and electronic boards enabling us to be one of the leaders in the markets:.

Do you have a range of BMSS available off the shelf?

We have a range of BMSs available off the shelf, which we can use as is or which can be adapted. To your specification, we can also custom develop and produce the BMS best suited to your application. Our software solutions will help you to analyse the operation of your battery to offer your customers ever greater safety and performance.

Does I-BMS support battery “hot swap”?

Battery charging is time consuming and depending on use-case, may come with various issues, such as unwanted downtime in industrial applications or difficulty in charging on the road for EVs. The i-BMS has the capability to completely eliminate these issues by supporting battery “Hot Swap” functionality.

What shunts are available for I-BMS products?

Tailor-made cell monitoring, temperature, I/O, and communication wire harnesses can be supplied for all i-BMS products. For all i-BMS products, a range of standard, compact, and high precision shunts are offered. The shunts

can be selected to fit almost any application-specific currents.
