# Cyprus Independent Energy Storage Project

## Overview

---

In May 2025, Cyprus brought its first significant battery energy storage system (BESS) online. The project marks a major step toward enhancing the country's energy infrastructure, aligning with its goals for renewable energy integration and grid stability.

In May 2025, Cyprus brought its first significant battery energy storage system (BESS) online. The project marks a major step toward enhancing the country's energy infrastructure, aligning with its goals for renewable energy integration and grid stability.

The Cypriot Department of Environment has approved the project for what is set to become one of the country's first battery energy storage systems. HESS Hybrid Energy Storage Systems is planning to install a 59 MW facility with a capacity of 120 MWh, which would ease the strain on the European.

In May 2025, Cyprus brought its first significant battery energy storage system (BESS) online. The project marks a major step toward enhancing the country's energy infrastructure, aligning with its goals for renewable energy integration and grid stability. The BESS project is a partnership between.

Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions on Tuesday, addressing the country's growing need to manage excess green energy production. The planned battery storage.

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country. Cyprus Energy Regulatory Authority (CERA) announced the approval earlier this week (18 June) of three projects which will be owned and operated.

Ever wondered how a Mediterranean island like Cyprus could become energy-independent?

Enter the Nicosia Electric Energy Storage Project - a game-changer that's turning heads in the energy sector. This €180 million initiative isn't just

another battery farm; it's like giving the entire island a.

In an ambitious move towards a sustainable energy future, Cyprus is set to operationalize its first large-scale electricity storage system within the next 16 months. This landmark project, unveiled by Energy Minister George Papanastasiou at the Green Agenda Cyprus Summit in Nicosia, addresses the. Does Cyprus have a battery energy storage system?

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country. Cyprus Energy Regulatory Authority (CERA) announced the approval earlier this week (18 June) of three projects which will be owned and operated by the Cyprus Transmission System Operator (TSOC).

Will Cyprus install 400MWh battery energy storage system?

Image: Cyprus government / MECI. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country.

How is Cyprus developing pumped hydro energy storage capacity?

The country is also seeking to develop pumped hydro energy storage (PHES) capacity with technical assistance from the European Commission (EC) and is formulating a National Hydrogen Strategy. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects.

How many energy storage applications have been approved in Cyprus?

The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules approval in 2021. The Cyprus Transmission System Operator has received 13 storage applications totaling 224 megawatts capacity, with eight applications processed and five under review.

Why does Cyprus waste so much energy?

AKEL MP Costas Costa characterised Cyprus as “the only country in the world where thousands of megawatt-hours go unused due to lack of centralised green energy storage systems,” adding: “During the day we waste megawatt-hours because we lack storage, and at night we are one step away from blackouts.”.

Is Cyprus facing a unique set of energy challenges?

In a keynote address to open a conference on energy storage and hydrogen in March, George Papanastasiou of the Ministry of Energy, Commerce and Industry (MECI) noted that Cyprus faces a “unique set of energy challenges, which require tailored solutions.”
