

SolarTech Power Solutions

Danish commercial wind power generation system

Overview

Denmark was a pioneer in developing commercial wind power during the 1970s, and today a substantial share of the wind turbines around the world are produced by Danish manufacturers such as Vestas—the world's largest wind-turbine manufacturer—along with many component suppliers. Furthermore, Denmark has—as of 2022—the world's 2nd highest amount of wind power ge. Watch full videoHistoryDanish inventor experimented, taught and constructed wind power projects around the year 1900. As concerns over grew in the 1980s, Denmark found itself with relatively high.
