

SolarTech Power Solutions

Danish solar container booster station

Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

Why should you choose the solardrive container power unit?

In remote areas where fuel is difficult or expensive to access, or in situations where you appreciate the silence of solar power, we can recommend considering the SolarDrive Container Power Unit as a supplement for the noisy and polluting generators. Preserving foods after harvest is crucial for the economy and environment.

Can You Power a container with solar power?

You have a container. Let's power it with carbon-free, cost-efficient, plug-and-play, electricity. We are experts in solar energy. Our patent protected solar power units fits perfectly on top of 20' or 40' containers. No more hassle to get cost-efficient, green, energy to your containers. Containers are used for many purposes.

Can a containerized Solar System be installed off-grid?

Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in

Southern Europe it can even be up to 50 households due to the high solar radiation.

How many installers does a solarcontainer need?

At least 3-4 installers and 1 crane operator are needed to put the Solarcontainer into operation within one day. How many households can one Solarcontainer supply with electricity?
