Huijue Group's next-generation home energy storage inverter system perfectly integrates the solar inverter, lithium-ion energy storage battery, and energy management system. The solar inverter, as the core component, is responsible for converting the DC electricity generated by the solar panels.

The answer lies in waveform quality. A pure sine wave inverter 220VDC to 220VAC solves this by replicating grid-quality electricity - something modified sine wave models simply can't achieve. In Germany's booming solar market, over 68% of new installations now insist on this technology for medical.
