

## SolarTech Power Solutions

# Dominica s guaranteed solar energy storage ratio

### ◆ PRODUCT INFORMATION ◆

-  **BATTERY CAPACITY**  
50kWh~500kWh
-  **DC VOLTAGE RANGE**  
400V~1000V
-  **DEGREE OF PROTECTION**  
IP54
-  **OPERATING TEMPERATURE RANGE**  
-10-50°C

## Overview

---

According to the country's Minister of Energy and Mines, Joel Santos, the Dominican Republic will need between 250 to 400 MW in energy storage systems by 2028.

According to the country's Minister of Energy and Mines, Joel Santos, the Dominican Republic will need between 250 to 400 MW in energy storage systems by 2028.

According to the country's Minister of Energy and Mines, Joel Santos, the Dominican Republic will need between 250 to 400 MW in energy storage systems by 2028. The Dominican Republic urgently needs to ramp up its energy storage capacity to stabilize its electrical system, said its Minister of.

- The Superintendency of Electricity (SIE) approved Resolution SIE-092-2025-LCE, which sets the technical and regulatory basis for a new national public tender to add up to 600 megawatts (MW) of solar and wind generation capacity. Under the resolution, the awarded energy will be contracted.

The Dominican Republic has launched a tender for up to 600 MW of solar and wind capacity, requiring projects to include at least four hours of battery storage to support stability in the National Interconnected Electric System (SENI). The Superintendency of Electricity (SIE) has approved Resolution.

With ambitious plans to achieve a 300 MW energy storage capacity by 2027, the nation aims to enhance the stability and reliability of its electricity grid, paving the way for a sustainable future. Energy storage is pivotal for integrating renewable energy sources, like solar and wind, into the.

The Latin American nation of the Dominican Republic targets to raise the share of renewable energy in its national energy mix to 25% by 2025 with solar energy being a major driver, according to the country's Minister of Energy and Mines Joel Santos. Under the National Development Strategy, their.

A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational by mid-2025. This system will participate in the spot market without a power purchase agreement (PPA), showcasing the growing confidence in the Dominican energy.
