Dominican Outdoor Power Supply

Overview

What type of power plug is used in the Dominican Republic?

This page is for travelers living in Canada. I live in another country. In the Dominican Republic, power plugs and sockets (outlets) of type A and type B are used. The standard voltage is 110 V at a frequency of 60 Hz.

What is the standard voltage in the Dominican Republic?

The standard voltage in the Dominican Republic is 110 V and the standard frequency is 50 Hz. What kind of power adapter do I need for the Dominican Republic?

Since US plugs are compatible with type A and type B outlets, American travelers shouldn't need an adapter or converter in order to charge their electronic devices in the Dominican Republic.

Do you need a universal travel adapter in the Dominican Republic?

Hotels in the Dominican Republic often have a limited number of outlets, so a universal travel adapter will help to keep your devices charged on your trip. In addition, this adapter has a fuse protector to prevent your devices from getting damaged by a defective outlet or an unexpected power surge.

Can I charge my phone while traveling in the Dominican Republic?

Unfortunately, there are few opportunities to charge your devices while traveling around the Dominican Republic, which can be an issue if you rely on your phone to get around safely. To solve this problem, I always keep one or two of these Portable Chargers in my pocket while traveling overseas.
