Double glass components for sloping roofs

Overview

Self-supporting solutions can be installed between 25-60°, on either an upstand (on a flat roof) or as a non-protruding installation in a sloped roof. Furthermore, it is possible to install a dual pitched solution with a girder at the ridge.

Self-supporting solutions can be installed between 25-60°, on either an upstand (on a flat roof) or as a non-protruding installation in a sloped roof. Furthermore, it is possible to install a dual pitched solution with a girder at the ridge.

Dual pitched solutions are two rows of VELUX Glazing Panels connected at the top, creating a ridge. Self-supporting solutions can be installed between 25-60°, on either an upstand (on a flat roof) or as a non-protruding installation in a sloped roof. Furthermore, it is possible to install a dual.

Ridgelight 25-40° is a classic rooflight solution, where two rows of modular skylights are connected at the ridge. The dual pitched Ridgelight solution is ideal for buildings with large roof openings. Ridgelight 25-40° with vented skylight modules on both sides is an optimal solution for buildings.

Overhead glazing installed on the apex of a pitched roof effectively allows natural light to enter a building. Our overhead glazing solutions include sloped glazing systems and skylights. Kawneer's multiple glazing options deliver spectacular aesthetics and curtain wall system performance. Overhead.

A VELUX Commercial glass roof system is a daylight solution available in a variety of design configurations and can meet specifications of any commercial building project. Suitable for both flat and sloped roofs, glass roof systems can be installed to optimize the amount of daylight that enters a.

Creating a light well by using glass in the roof is a popular way of introducing light to central areas of a building. In addition to the normal considerations of thermal and solar control, sloping glazing is overhead glazing and we need to choose glass that is safe. If the glass forms part of an.

*Tested for the US-Market, these skylights adhere to stringent quality and safety regulations. The flap system is suitable for different roof shapes of the Glass Roof PR60 but are also ideal for upgrading older roof structures as they can be integrated into other systems. Information on our smoke.
