

SolarTech Power Solutions

Egypt 2025 solar Energy Storage

*Support photovoltaic input and AC mains input
Suitable for home energy storage and emergency backup power supply*

Overview

Egypt signed deals on November 5, 2025, with a joint venture to develop two solar power projects totaling 1,200 MW and 720 MWh of battery storage. How does solar power work in Egypt?

It takes Egypt's green energy transition to another level by harnessing the power of the sun, not just during the day but also at night, thanks to the combination of solar and battery storage. The project addresses the growing demand for electricity and reduces the need to import expensive fossil fuels.

How many MW solar & battery storage will be built in 2026?

The project will be constructed in two phases. The first phase of 561 MW solar + 100 MW/200 MWh battery storage is targeted to reach commercial operational date (COD) in the first half of 2026 and the second phase of 564 MW solar in the second half of 2026.

Could battery storage be a game-changer for Egypt's energy sector?

The integration of battery storage with solar PV is a game-changer for Egypt's energy sector, providing reliable and dispatchable renewable energy and reducing reliance on fossil fuels. It not only meets Egypt's current energy needs but also sets a precedent for future dispatchable hybrid renewable energy projects in the region.”.

Will Egypt achieve 42 percent of renewables by 2030?

Egypt aims to reach 42 per cent of renewables in its power mix by 2030. The solar power plant is expected to generate approximately 3,000 GWh per year of additional renewable power, which will enhance grid stability and manage peak demand. It will also reduce carbon dioxide emissions by up to 1.4 million metric tonnes annually.

Are solar panels a viable long-term option for Egypt?

Also, high solar panel prices deterred the government from considering solar a

viable long-term option for Egypt. Off-grid development appeared to be solar energy's only economically viable application. But prices of solar panels have fallen over the past few years.

Is there enough attention to solar energy in Egypt?

"There is not enough attention paid to the segment below 500 MW," claims Khaled Gassar, chairman and cofounder of the Solar Energy Development Association (SEDA), an NGO that seeks to develop the solar energy market in Egypt.
