El Salvador is making significant strides to expand its renewable energy capacity, with new solar and wind projects set to come online by 2025. At the forefront is AES El Salvador, which is bringing its Bósforo solar project to full operation and advancing the upcoming Capella Solar project.

CECSA, a subsidiary of the National Electrical Transmission Entity (ENTE), has unveiled the first two hybrid power plants in El Salvador, integrating hydroelectric and photovoltaic generation. Situated in San Matías and San Luis, these plants collectively supply 5.1 MW into the national grid.

POWERCHINA has been awarded a contract to construct the 30MW La Trinidad solar project in El Salvador, part of the broader 70MW San Miguel solar initiative. The plant will feature over 62,000 Longi solar modules mounted on single-axis trackers, enhancing efficiency by following the sun's path. Once.
