# Energy Storage ESS Base Station Power Requirements

## Overview

---

When do the energy storage standards apply?

When do the Standards Apply?

The 2022 Energy Code now requires that all single-family buildings with one or two dwelling units must be energy storage (battery storage) system ready. What are the Energy Storage Systems Ready Requirements (ESS)?

.

How much energy can a ESS unit store?

Individual ESS units shall have a maximum stored energy of 20 kWh per NFPA Section 15.7. NFPA 855 clearly tells us each unit can be up to 20 kWh, but how much overall storage can you put in your installation?

That depends on where you put it and is defined in Section 15.7.1 of NFPA 855.

Could a 200 amp panel meet the mandatory energy storage system (ESS) ready requirements?

Could a 200 amp panel meet the mandatory energy storage system (ESS) ready requirements in section 150.0 (s)1B?

Yes. A 200 amp panel could meet the requirement if the busbar rating is 225 amps and it is clearly marked on the panel.

What is the battery energy storage system guidebook?

A public benefit corporation, NYSERDA has been advancing energy solutions and working to protect the environment since 1975. The Battery Energy Storage System Guidebook contains information, tools, and step-by-step instructions to support local governments managing battery energy storage system development in their communities.

What is a battery ESS?

Battery ESS are the most common type of new installation and are the focus of this fact sheet. DID YOU KNOW?

Battery storage capacity in the United States is expected to more than double between 2022 and 2025 from 9.4 GW to 20.8 GW, according to the U.S. Energy Information Administration.

What is an energy storage system?

An energy storage system is defined in the 2022 Energy Code as one or more devices assembled together to store electrical energy and supply electrical energy to selected loads at a future time. A minimum of four branch circuits and their source at a single panelboard supplied by the ESS. At least one circuit shall supply:
