

## SolarTech Power Solutions

# Energy storage battery 30kWh lithium iron phosphate

## Overview

---

LiFePO<sub>4</sub> 30kWh Battery Pack Stack for Solar Storage UPS System, lithium iron phosphate battery cell with higher safety performance, without heavy metals, pollution-free, green, and environmentally friendly, ordinary lead-acid batteries below 0 °C, the power is less than 50%, lithium batteries at -20 °C can still release more than 90% of the power, so the lithium iron phosphate batteries can perfectly replace lead-acid batteries in solar energy, UPS energy storage, data centers, and other use scenarios, whether it is weight, capacity, size, cycle life, etc., lithium iron phosphate are beyond lead-acid batteries! Are lithium iron phosphate batteries the future of solar energy storage?

Let's explore the many reasons that lithium iron phosphate batteries are the future of solar energy storage. Battery Life. Lithium iron phosphate batteries have a lifecycle two to four times longer than lithium-ion. This is in part because the lithium iron phosphate option is more stable at high temperatures, so they are resilient to over charging.

What are lithium iron phosphate batteries (LiFePO<sub>4</sub>)?

However, as technology has advanced, a new winner in the race for energy storage solutions has emerged: lithium iron phosphate batteries (LiFePO<sub>4</sub>). Lithium iron phosphate use similar chemistry to lithium-ion, with iron as the cathode material, and they have a number of advantages over their lithium-ion counterparts.

What is a 30kWh battery?

The 30kWh battery uses Grade A lithium iron phosphate cells to ensure its performance and lifespan. These cells have sufficient capacity, excellent consistency, strong stability, and high safety, providing the battery pack with outstanding discharge efficiency. Each module is equipped with a smart BMS to protect the battery.

What are the benefits of a 30kWh battery pack?

The 30kWh battery pack is stable, efficient, and can provide backup power for

many devices and situations. Home Energy Storage The 30kWh battery can convert the solar energy stored during the day into electricity, ensuring that home appliances run smoothly. It enhances power stability for your home while reducing electricity costs.

What is a 30kWh LiFePO4 battery?

The 30kWh lifepo4 battery has an output voltage of 51.2V and a storage capacity of 600Ah. It consists of three battery modules and a movable base. Its dimensions are 690×590×450/580mm, and it weighs 270kg. Each module features an LED screen and buttons, making it easy to set up and check the battery status.

How many charge and discharge cycles does a 30kWh battery support?

This 30kWh battery storage supports up to 6,500 charge and discharge cycles, helping to maximize your long-term benefits. The Delong 30kWh battery can communicate with industry-leading inverters, such as Growatt, SMA, and Deye. It connects through CAN or RS485 ports to convert DC into AC for powering devices.
