

## SolarTech Power Solutions

# Energy storage power station manufacturing project

## Overview

---

How will a 100MW battery energy storage system work?

The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the 100MW battery energy storage project will be able to discharge electricity to the grid particularly during peak demand.

How many states have energy storage projects under construction?

The need for energy storage resources continues to be strong across the country, as 31 states currently have energy storage projects under construction.

How is the energy storage industry preparing for a grid-scale energy storage supply chain?

The energy storage industry is making significant progress in laying the groundwork for a domestic battery energy storage supply chain, building or expanding more than 25 manufacturing facilities for grid-scale energy storage. With today's investment commitment, the industry has announced plans to rapidly expand ongoing efforts.

Why is the energy storage industry important?

"The energy storage industry is providing essential power when needed most while boosting domestic manufacturing and creating jobs across the country," said Jason Grumet, CEO of ACP.

What is a battery manufacturing project?

These projects will advance platform technologies upon which battery manufacturing capabilities can be built, enabling flexible, scalable, and highly controllable battery manufacturing processes.

Where is elevate renewables developing a utility-scale energy storage facility?

Elevate Renewables is developing a utility-scale energy storage facility at the Essex Generating Station located 5 miles from New York City in Newark, New Jersey. Elevate Renewables is developing a utility-scale energy storage facility at the Sewaren Generating Station located less than 1 mile from New York City near Woodbridge, NJ.
