# Energy storage project investment of US\$1.3 billion

## Overview

---

The U.S. Department of Energy (DOE) Office of Clean Energy Demonstrations (OCED) today opened applications for up to \$1.3 billion in funding to catalyze investments in transformative carbon capture, utilization, and storage (CCUS) technologies.

The U.S. Department of Energy (DOE) Office of Clean Energy Demonstrations (OCED) today opened applications for up to \$1.3 billion in funding to catalyze investments in transformative carbon capture, utilization, and storage (CCUS) technologies.

The U.S. Department of Energy (DOE) Office of Clean Energy Demonstrations (OCED) today opened applications for up to \$1.3 billion in funding to catalyze investments in transformative carbon capture, utilization, and storage (CCUS) technologies. The U.S. Department of Energy (DOE) Office of Clean.

This week, Primergy Solar, a subsidiary of investment manager Quinbrook Infrastructure Partners, announced that it has secured financing for its long-planned 690 -megawatt (AC) Gemini solar-plus-storage project. Located in southern Nevada, the project is set to be the largest continuous solar.

The Office of Clean Energy Demonstrations said it anticipates the funding solicitation will be released in late 2024. The U.S. Department of Energy (DOE) has set aside up to \$1.3 billion to foster investment in carbon capture, utilization and storage (CCUS) technologies. With funding from the.

OCED issued a Notice of Intent (NOI) to fund up to \$1.3 billion to catalyze investments in transformative carbon capture, utilization, and storage (CCUS) technologies. Washington, D.C.— As part of Biden-Harris Administration's Investing in America agenda This funding—made possible by President.

Clean energy companies say the federal Inflation Reduction Act (IRA) has dramatically boosted their businesses, and that repealing or rolling back the landmark climate and clean energy law would result in substantial losses, layoffs, and closures, according to a first-of-its kind survey of more.

The expansion of Moss Landing Energy Storage Facility in California, already the world's biggest BESS project, to more than 3GWh was one of the highlights of the first half of this year for the US energy storage industry. Image: Vistra Energy. A roundup of the biggest projects, financing and.
