## Overview

---

Scaling up the use of of-grid solar energy is essential for achieving Ethiopia's energy, food, water, economic, health, and education goals, as well as its climate change targets.

Scaling up the use of of-grid solar energy is essential for achieving Ethiopia's energy, food, water, economic, health, and education goals, as well as its climate change targets.

The National Roadmap for Scaling Up Productive Use of Renewable Energy (PURE) in Ethiopia was developed by the Ethiopian Solar Development Association (ESEDA) and the National PURE Taskforce chaired by the Ministry of Water and Energy (MoWE), with the financial support of the German Federal.

Ethiopia's NEP 2.0 is an ambitious project with the goal of providing electricity to all by 2025. The program utilizes a synchronized strategy that integrates grid and off-grid solutions for effective last-mile service delivery. The goal is for 65% of the population to have access to electricity.

Addis Ababa, August 13, 2025 (ENA) -- Ethiopia is uniquely positioned to leverage solar energy not only to meet domestic needs but also to become energy hub, State Minister of Water and Energy Sultan Welle said. Ethiopia and International Solar Alliance (ISA) have signed Solar Mini-Grid and Solar.

Ethiopia is increasingly identifying the urgent need to transition from traditional energy sources to more sustainable alternatives. Among these, solar energy emerges as a beacon of hope, poised to transform Ethiopia's energy landscape and drive socioeconomic development. Significantly, the country.

zation multi-energy resource) pro software. The simulation results showed that the PV-wind based grid-connected micro grid system with a storage battery 0,000 off-grid consumers in Africa by 2027. RePower, formally known as "Improving Renewables Penetration Through Plug and Play Microgrids," aims.

Ethiopia is poised to become a global model for renewable energy transition, harnessing its abundant solar resources to deliver affordable and reliable electricity while driving sustainable development. According to the latest Power Systems Transformation report by the Energy Transitions Commission.
