Flywheel Energy Storage Project Quote

All in one
50-500 Kwh
Hybrid
System

Overview

A typical 1 MW flywheel system ranges between \$300,000 to \$600,000. But why the gap?

It's like comparing a bicycle to a Ferrari - both have wheels, but the specs matter. Rotor material: Carbon fiber?

Steel?

Your choice adds \$100k+ swings. Vacuum systems: Better seals = less friction = higher upfront cost.
