

## SolarTech Power Solutions

# Flywheel energy storage project investment returns

## Overview

---

What is the market share of Flywheel energy storage in 2025?

Utility will dominate with a 46.8% market share in 2025. The flywheel energy storage market is projected to reach USD 1.3 billion in 2025 and expand to USD 2.0 billion by 2035, advancing at a CAGR of 4.2 % during this period.

Are flywheel energy storage systems cost-effective?

The levelized cost of storage (LCOS) for flywheels is expected to decrease as advances in materials science and manufacturing processes are made. Fig. 23 shows the projected properties of flywheel energy storage systems for 2030, indicating improvements in cost-effectiveness and performance. Fig. 23.

Where is a flywheel energy storage system located?

Source: Endesa, S.A.U. Another significant project is the installation of a flywheel energy storage system by Red Eléctrica de España (the transmission system operator (TSO) of Spain) in the Mácher 66 kV substation, located in the municipality of Tías on Lanzarote (Canary Islands).

Why are energy storage Flywheel systems gaining traction?

Energy storage flywheel systems are gaining traction due to their ability to deliver rapid energy discharge, high cycle life, and minimal environmental impact. Renewable energy integration stands as the largest driver, particularly in wind and solar power applications.

Do flywheels play a role in modern energy systems?

Having evaluated both the theoretical and experimental studies on the applications of flywheels in terms of stabilization and dynamic storage, several critical observations emerge regarding the role of FESSs in modern energy systems.

What is the Dinglun flywheel energy storage power station?

The Dinglun Flywheel Energy Storage Power Station, the World's Largest Flywheel Energy Storage Project, represents a significant step forward in sustainable energy. Its role in grid frequency regulation and support for renewable energy will help stabilize power systems as China continues to increase its reliance on wind and solar energy.
