## Overview

---

Germany's statistical office Destatis earlier this week said that about 3.4 million solar power installations were connected to the grid across Germany in April 2024, which equals nearly 30 percent more installations and 20 percent more installed capacity than one year before.

Germany's statistical office Destatis earlier this week said that about 3.4 million solar power installations were connected to the grid across Germany in April 2024, which equals nearly 30 percent more installations and 20 percent more installed capacity than one year before.

A pioneer in solar energy, Germany began investing in harnessing the sun's power in the 1990s. Today, it has one of the highest outputs of solar energy in the world, having surpassed the milestone of 100 GW of solar capacity in January 2025. In 2024 alone, around 17 GW of new photovoltaic (PV).

The fast pace of Germany's solar PV expansion is causing concerns among energy companies about the buildout's effect on the grid, business daily Handelsblatt writes. "If expansion just goes on unchecked, this will increase the risk of grid instability," Maik Render, head of energy provider N-Ergie.

Though not the first destination that comes to mind for abundant sunshine, Germany is leading the solar PV deployment race in Europe. Not only does the country have the highest European PV ambitions for 2030, but it has also deployed the most solar capacity in Europe to date - as depicted below in.

Germany aims to install 215 GW of PV capacity by 2030, with annual expansion targets to be tripled from 7.5 GW to 22 GW in 2026. Solar Package I, approved in August 2023, aims to accelerate PV installation and enhance citizen participation, albeit, it is still under negotiation within the.

How KPMG supports companies in utilising the growth opportunities of sustainable transformation. How KPMG helps companies capitalise on new growth opportunities. The sustainable transformation of the German economy is essential to ensure the country's competitiveness. The focus of this.
