# Ghana Energy Storage Project 2025

## Overview

---

What is the Energy Outlook for Ghana?

cers for this year. The Energy Outlook for Ghana outlines projections for energy demand and supply for the year 2025. It provides an overview of the actual performance of the energy sector, specifically the electricity and petroleum industry performance, as well as the woodfuel subsector of the preceding year (2024), comparing actual

What is Ghana's Electricity consumption in 2025?

figure of 24,688 GWh. In 2025, projected electricity consumption is 25,836 GWh, representing a 4.7% increase. Hydro, thermal, and renewables constitute Ghana's electricity generation mix. Installed generation capacity, excluding embedded capacity as of November 2024, was 5,260 MW, with a total dependable capacity.

How can Ghana achieve net-zero emissions by 2060?

Ghana energy transition and investment plan. Achieve net-zero emissions by 2060 while ensuring economic growth and sustainability. Implement renewable energy, energy efficiency, hydrogen, e-mobility, energy solutions. National electricity access plan. Achieve universal electricity access for all Ghanaians by 2030. 96% on-

How many net-metered rooftop solar PV systems will be installed in Ghana?

In addition, 12,000 net-metered rooftop solar PV systems will be installed nationwide to support Ghana's transition toward a greener energy mix. Hon. Jinapor acknowledged the resilience of the people in remote communities without electricity who have long awaited connection to the national grid.

How much natural gas is consumed in Ghana in 2025?

such as distillation. In 2025, a total of 13,788 MMscf of natural gas is projected to be consumed by industries in Ghana. Natural gas consumption is expected to

peak at about 39mmscfd in the last quarter of 2025 as new ceramics industries such as Tetracore, Continental Blue Investmen Gh, and CIMPOR Gh. Ltd are expected to begin product.

What will be the energy supply in 2025?

ity supply in 2025. The remaining supply of 196 GWh, representing 0.8%, is expected to be met by other renewables, including solar PV and biogas operating at the sub transmission level. Power import in 2025 is not anticipated. However, inadvertent energy exchanges estimated at 82 GWh (0.3% n tie-lines could result f
