The projects will pair solar PV with two different energy storage technologies, including one based around molten salt. Image: Mytilineos. The European Commission has approved a €1 billion (US\$1.1 billion) state aid measure for Greece to support two solar-plus-storage projects. Consisting of two.

Greece is entering a new phase in its clean energy transition. After years of leading southern Europe in solar power expansion, the country is now shifting its focus to energy storage, a critical move to ensure flexibility, grid stability, and continued momentum in renewables deployment. With solar.
