Grenada outdoor power supply information and prices

Overview

What type of power plug is used in Grenada?

In Grenada, the power plug sockets are of type G. The standard voltage is 230 V and the frequency is 50 Hz. A power plug adapter is needed if you're traveling from a country with a different plug type, such as Canada.

Does Grenada have a power system?

From its capital city of St. George's to the diverse natural beauty of the interior, Grenada offers a unique and memorable travel experience. To ensure your electronic devices stay charged and operational throughout your trip, it's important to understand the local power system.

What is the supply voltage in Grenada?

In Grenada the supply voltage is 230V. If the appliance is a single voltage rated appliance, it will need to operate at the same voltage as the supply voltage of the country i.e. 230V. If this is not the case it should be used alongside a voltage transformer or converter to allow the appliance to work safely and properly.

Do I need a power adapter to travel to Grenada?

If you are traveling to Grenada with electronic devices from a country with a different voltage or frequency, you will need to use a power adapter and possibly a voltage converter to ensure safe and proper operation of your devices.

Does Grenada have a USB adapter?

With its diverse range of plugs encompassing over 150 countries, including Grenada, you can stay connected and powered up wherever your journey takes you. This adapter is equipped with multiple USB ports and a standard socket, allowing you to charge multiple devices simultaneously.

Do I need a voltage converter in Grenada?

The voltage used in Grenada is 230 V, which is different from the standard voltage in many countries. If your electronic device is designed for a different voltage, you will need a voltage converter to use it safely in Grenada. For example, if your device is designed for 110 V, you will need a converter to step down the voltage from 230 V to 110 V.
