

## SolarTech Power Solutions

# High voltage 2000v energy storage system

## Overview

---

Is 2000V DC a high-voltage system?

New IEC standards need to be developed for systems above 1500V DC, as above 1500V DC is considered a high-voltage system. Signs that 2000V system is coming to reality Sungrow integrated 2000V DC inverters into a grid-connected solar PV project in 2023. Battery companies like REPT and Envision have already launched 2000V DC architecture BESS.

Is a 3000V DC inverter a high-voltage system?

Their certifications are more difficult. In 2022, a popular inverter company planned to use a 3000V DC architecture but later cancelled the project due to certification challenges. New IEC standards need to be developed for systems above 1500V DC, as above 1500V DC is considered a high-voltage system.

Does Hioki have a high-voltage probe for solar PV measurement?

In 2021, Hioki launched a high-voltage probe as per CAT III 2000V safety standards for solar PV measurement. Battery Cluster Testing machines have come in the market which support 2000V DC, 300A. Previously, they were making 1500V, 400A type. The power of 600kW is kept the same, and the DC voltage platform has been changed from 1500V to 2000V.

Why is Sungrow transforming PV power systems from 1500V to 2000V?

The project is notable for the cost reduction and efficiency increase in the evolution of PV power systems from 1500V to 2000V through the high-voltage inverter developed by Sungrow. Compared to 1500V, the 2000V system increases the voltage by 33%, challenging the inverter's ability to withstand the voltage and its reliability.

Which companies are launching 2000V DC inverters?

Battery companies like REPT and Envision have already launched 2000V DC architecture BESS. Many companies are gearing up to launch 2000V DC

architecture inverters (Solar and Battery) and BESS. In 2021, Hioki launched a high-voltage probe as per CAT III 2000V safety standards for solar PV measurement.

Are 2000V inverters coming to a grid-connected solar PV project?

Signs that 2000V system is coming to reality Sungrow integrated 2000V DC inverters into a grid-connected solar PV project in 2023. Battery companies like REPT and Envision have already launched 2000V DC architecture BESS. Many companies are gearing up to launch 2000V DC architecture inverters (Solar and Battery) and BESS.
