

## SolarTech Power Solutions

# How long does the battery backup power of a telecom base station last

## Overview

---

Q2: How long can telecom backup batteries typically provide power?

A2: Backup duration depends on capacity and load but typically ranges from several hours to over a day during outages. Which battery is best for telecom base station backup power?

Among various battery technologies, Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent thermal stability.

Why is backup power important in a 5G base station?

With the rapid expansion of 5G networks and the continuous upgrade of global communication infrastructure, the reliability and stability of telecom base stations have become critical. As the core nodes of communication networks, the performance of a base station's backup power system directly impacts network continuity and service quality.

What makes a telecom battery pack compatible with a base station?

Compatibility and Installation Voltage Compatibility: 48V is the standard voltage for telecom base stations, so the battery pack's output voltage must align with base station equipment requirements. Modular Design: A modular structure simplifies installation, maintenance, and scalability.

How do you protect a telecom base station?

Backup power systems in telecom base stations often operate for extended periods, making thermal management critical. Key suggestions include:  
Cooling System: Install fans or heat sinks inside the battery pack to ensure efficient heat dissipation.

How long does a LiFePO<sub>4</sub> battery last?

This is crucial for telecom base stations that require continuous operation.

Long Cycle Life LiFePO<sub>4</sub> batteries can achieve over 2,000 cycles, and in some cases up to 5,000 cycles, far surpassing the 300-500 cycles of lead-acid batteries. This translates to lower replacement frequency and maintenance costs.

What is a 48V 100Ah LiFePO<sub>4</sub> battery pack?

Our 48V 100Ah LiFePO<sub>4</sub> battery pack, designed specifically for telecom base stations, offers the following features: High Safety: Built with premium cells and an advanced BMS for stable and secure operation. Long Lifespan: Over 2,000 cycles, significantly reducing replacement and maintenance costs.
