

SolarTech Power Solutions

**How many billions of dollars are
invested in wind solar and
energy storage projects**

Overview

London, August 26, 2025 – Global investment in new renewable energy projects hit a record \$386 billion in the first half of 2025, up 10% from the previous year.

London, August 26, 2025 – Global investment in new renewable energy projects hit a record \$386 billion in the first half of 2025, up 10% from the previous year.

American clean power saw nearly \$80 billion in investment and supported 1.4 million jobs in 2024. The clean power industry continued its steady expansion in 2024, delivering 49 gigawatts of new capacity—representing a 33% increase from 2023. This growth brought America’s total clean energy fleet to.

Power sector investment in solar photovoltaic (PV) technology is projected to exceed USD 500 billion in 2024, surpassing all other generation sources combined. Though growth may moderate slightly in 2024 due to falling PV module prices, solar remains central to the power sector’s transformation. In.

In 2023 alone, U.S. renewable energy investments reached an impressive 92.9 billion dollars, a striking increase from previous years. These investments not only signify a commitment to combat climate change but also highlight the potential for economic growth in the clean energy sector. With.

London, August 26, 2025 – Global investment in new renewable energy projects hit a record \$386 billion in the first half of 2025, up 10% from the previous year. However, asset finance for utility-scale solar and onshore wind shrank by 13% compared to 1H 2024, reaching the lowest share of total.

Over the past four quarters, \$276 billion was invested across the U.S. in the manufacture and deployment of clean energy, clean vehicles, building electrification and carbon management technology, up 8% from the previous year. \$68 billion of this investment occurred in the second quarter of 2025, a.

Annual spending by major utilities to produce and deliver electricity increased

12% from \$287 billion in 2003 to \$320 billion in 2023 as measured in real 2023 dollars, according to financial reports to the Federal Energy Regulatory Commission (FERC). Capital investment in electric infrastructure.
