Overview

A current list of U.S. solar panel manufacturers that produce solar panels for the traditional American residential, commercial and utility-scale markets.

A current list of U.S. solar panel manufacturers that produce solar panels for the traditional American residential, commercial and utility-scale markets.

This is a current grouping of solar manufacturers in the United States that produce solar panels and their associated materials for the traditional residential, commercial and utility-scale markets. This data is collected by Solar Power World editors and will be continually updated as facilities.

Today, US solar manufacturing facilities can produce over 51 gigawatts (GW) of solar modules annually —enough capacity to meet nearly all domestic demand for solar installations. This manufacturing renaissance spans the entire supply chain, from polysilicon production to complete solar panel.

The U.S. Solar Photovoltaic Manufacturing Map shows only active manufacturing sites that contribute to the solar photovoltaic supply chain. It details their nameplate capacities, or the full amount of potential output at an existing facility, where known. This does not imply that these facilities.

In 2022, the Biden Administration announced waiving tariffs on solar panel imports from Vietnam, Malaysia, Cambodia and Thailand to accelerate solar panel installations across the country in favor of renewable energy. While this didn't hinder revenue, it caused a slowdown in growth in the middle of.

The Inflation Reduction Act (IRA) of 2022 played a key role in this transformation, offering tax credits and financial incentives to companies that manufacture solar components in the U.S. Additionally, tariffs on foreign-made solar products helped level the playing field, making American-made.

Discover which companies produce the highest number of solar panels around the world. What kind of home do you live in?

The Shanghai-based company has 14 factories in China, Malaysia, Vietnam,

and the US, and 57,000 employees – of whom 1,500 work in the firm's eight research and development.
