---

Installing residential solar panels can cost between \$10,000 and \$30,000 or more. The size of your solar panel system is a big factor in your overall solar costs. A typical New York.

Installing residential solar panels can cost between \$10,000 and \$30,000 or more. The size of your solar panel system is a big factor in your overall solar costs. A typical New York.

The cost of solar panels varies based on system size, equipment type, and installation factors. In New York, the average cost of a solar panel system ranges from around \$30,000 to \$50,000 before tax credits. The cost-per-watt in New York averages around \$3.20, and is a valuable metric for comparing.

One of the first questions you're likely to ask when starting your solar research is, "How much do solar panels cost?"

" or "How much will my solar installation cost?"

" The short answer is, it varies from household to household. In fact, there are a number of factors that go into calculating the cost.

The cost of solar panels in New York reflects this sunny opportunity, ranging between \$13,300 and \$21,000 for the average system. While it may cost more to install solar panel systems in New York than other states, local tax incentives, financing programs and unique net metering options can balance.

For now, the cost of our 5 kW solar system on Long Island remains at \$20,000. Related reading: [Going Solar in Westchester County: Incentives and Local Installers](#) While the NY-Sun incentive is a nice-to-have, the federal and state solar tax credits are the real game-changers. As of May 2025, the.
