

## SolarTech Power Solutions

# How much does the Serbian energy storage power supply cost

**Parallel** (Parallel operation up to 6 unit (only with battery connected))

**AC input wires**

**AC output wires**

## Overview

---

Srbijagas Director Dusan Bajatovic revealed that the country is preparing to build a new gas storage facility near Belgrade, with investment estimates ranging from 350 to 500 million euros. How much power does Serbia have?

It currently has a total capacity of approximately 3490 megawatts (MW) of renewables, with 2342 MW in hydropower in 2019 according to the European Energy Community. Serbia announced plans to install new hydropower plants and two existing dams, and to rehabilitate a further 15 existing power plants totaling around 30 MW with EBRD financing.

Does Serbia subsidize coal & electricity prices?

Serbia heavily subsidizes coal and electricity prices, inhibiting competition. Recently, the Serbian government and EPS have announced ambitious plans to transition to green energy solutions and reduce Serbia's dependence on Russian natural gas.

What percentage of Serbia's electricity comes from coal?

Serbia's national power utility Electric Power of Serbia (EPS) produces nearly 70 percent of the country's electricity from coal and nearly 27% percent from hydropower, with approximately 4% coming from private developers in wind and solar energy. Serbia heavily subsidizes coal and electricity prices, inhibiting competition.

How much hydropower does Serbia have?

Serbia has plans to significantly expand its installed hydropower and renewables capacity in the coming years. It currently has a total capacity of approximately 3490 megawatts (MW) of renewables, with 2342 MW in hydropower in 2019 according to the European Energy Community.

What is Serbia's energy investment plan?

The Ministry of Mining and Energy has announced a €15 billion investment

plan for the electricity sector in next several years, expecting to reach more than 3 GW of renewable energy production plants. The main players and investors in the Serbian Energy Sector are:.

Does Serbia still use lignite?

Lignite still covers half of total energy consumption, despite the rising share of oil products. Many lignite-fired and hydropower projects remain on hold, despite new capacity needs. Serbia is developing new power and gas interconnections with neighbouring countries. The energy policy is a prerogative of the Ministry of Mining and Energy.
