How to move the outdoor cabinet to the roof of the base station

Overview

Set the cabinet boxes into the openings, pushing each back until the flange butts against the mortared face of the island. Secure the box through the bottom and into the base framing with 2-inch deck screws.

Set the cabinet boxes into the openings, pushing each back until the flange butts against the mortared face of the island. Secure the box through the bottom and into the base framing with 2-inch deck screws.
