

SolarTech Power Solutions

Hybrid Energy Contracting for Sudan Telecommunication Base Stations

 **TAX FREE**    

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

Overview

What is a hybrid energy storage system?

Hybrid energy storage systems using battery energy storage has evolved tremendously for the past two decades especially in the area of car manufacturing either in a fully hybrid electric car or hybrid car that use battery energy storage with internal petrol combustion engine .

What is unique about this research based on hybrid energy storage?

The interesting or unique about this research compared to other research-based on hybrid energy storage is to apply hybrid energy storage in the poor grid and bad grid scenarios which are not discussed in another research before.

Which hybrid system has the lowest CAPEX cost?

We can observe that the 4/96 hybrid configuration has the lowest CAPEX cost among other hybrid configurations and also other battery types namely the VRLA 12V and 0/100 12V with replacement cost being considered OPEX. The system with the lithium-ion battery has the highest cost and using VRLA is cheaper.
