

SolarTech Power Solutions

Industrial dedicated inverter price

Features and applications
17000V, 1000A, 1000V

1000V, 1000A, 1000V

Overview

What are industrial inverters?

Industrial inverters are electrical power converters that change direct current (DC) to alternating current (AC). They are designed for industrial use to safeguard critical loads in places of high power shortage, such as high-rise buildings, offices, and industrial power plants. EnerTech delivers the finest industrial inverters that are efficient in saving energy bills even in the most extreme climatic conditions.

What is a cheap inverter?

Of the same, that can be categorized as a cheap inverter. It should be noted that it has a range of current output between 30 and 160 A and a duty cycle of 60%. It is an arc model with DC IGBT technology, it has a non-stick system, hot start and is also equipped with safety functions.

What makes the AE 500TX a good inverter?

Optional DC circuit breaker subcombiner enables low cost compliance with current safety and electrical codes. Built-in advanced power controls and optional factory-installed performance monitoring make the AE 500TX the industry's most fully integrated and configurable inverter in its class, saving installation time and expense.
