How much does a string inverter cost?

String inverters cost \$800 to \$2,500 on average. Most homes only require a single inverter, but you could need up to three if you have a larger-than-average residential solar energy system. String inverters work by connecting several solar panels, which send their electricity to a central point where the inverter converts the power.

How much does a microinverter cost?

While they cost more than string inverters, averaging \$1.15 per watt, they offer the benefit of independent panel optimization. For a 5 kW system, the cost is approximately \$5,750. Microinverters generally come with warranties of around 25 years, which aligns with the expected lifespan of the solar panels themselves.
