Energy storage systems are increasingly in demand to increase the effectiveness of solar power arrays. The landmark tax-and-spending legislation signed into law by President Donald Trump on July 4 changed a lot of policies and tax incentives. Most notable for green energy advocates is the September.

How storage tech, fuel cells, and batteries could become Wall Street's next megatrend AI Is Creating an Energy Crunch: The explosive growth of AI data centers is straining U.S. power capacity, with a projected 36 GW shortfall by 2028 – driving demand for new energy generation and storage.
